

1048.10 CABINET LOCK

These kind of electric locks are a simple way to protect cabinets and drawers to prevent unauthorized persons from looking at your files or gaining access your valuables,

They are versatile, compact and have high operating comfort. Cabinet locks can be used instead of the standard mechanical locks or additionally as electric access control.

The cabinet lock is versatile and can be installed either at the side or front, regardless of whether it is used for drawers or doors. There are some versions which integrated a potential-free change-over contact that has a variety of uses, it shows for example, the opening state of the door or it can be used for evaluation purposes. It can also be used for additional switching functions so that, e.g. when the door is open, the lighting is simultaneously switched on.

Overview of Advantages

- Secure locking of furniture
- Compact and versatile
- High operating comfort
- Used instead of mechanical locks or additionally as electrical access control

Technical Features
