	M-1157	10mm	White
	M-1158	10mm	Braun

Vandalism-proof door loops

Thanks to its special composition, this Vds-tested door loop is designed for maximum mechanical loads. Together, the solid zinc die-cast end pieces, line protection and internal Bowden cable form a surface-mounted door loop that can meet any demands. The maximum load on the spring/protective hose is 100 kg. This product is typically used in public buildings, such as schools, administrative buildings and specially correctional facilities, as well as anywhere where it is particularly important to protect the wiring from external influences.

Reference	Lenght	Inner/Outer diameter	Color
M-1285	400mm	10/13,5mm	Nickel-plated
M-1295	400mm	10/14mm	Nickel-plated

Miniature door loop M-1280.

Stainless steel miniature door loop is mainly used in windows but its compact design means that it can also be used in doors.

Length: 191mm & Inner diameter: 5,3mm.
